

HERMINE SANASARYAN

Senior Android Developer

CAREER SUMMARY

Senior Android Engineer with experience leading end-to-end mobile application development across diverse domains including video communication, wearable devices, game development, and media processing. Proven ownership of architecture, SDLC execution, and production stability, with strong focus on automation, release engineering, and developer efficiency. Consistently delivered highly stable applications, maintaining ~99.95% crash-free sessions in production over multiple years.

EXPERIENCE

Senior Android Developer - Marktguru

Feb 2019 - Present

- Led end-to-end Android application development, owning architecture decisions and driving delivery across the full SDLC from concept to production and maintenance
- Established and evolved automated release pipelines, enabling reliable, repeatable, and faster production deployments with reduced operational risk
- Designed and implemented dependency automation workflows, improving security posture and reducing long-term maintenance effort through continuous updates
- Drove long-term production stability initiatives, sustaining ~99.95% crash-free sessions across multiple years through proactive quality, monitoring, and engineering practices
- Collaborated cross-functionally with product, design, and backend teams to align technical execution with product goals and improve overall user experience

Android Developer - Cloud Communications and Computing Corp.

Nov 2016 - Feb 2018

- Built a video calling application integrating the Zoom SDK, enabling real-time audio/video communication

Android Developer - Energize Global Services

Apr 2015 - Nov 2016

- Contributed to the development of a video editing application, implementing features focused on media processing, editing workflows, and performance optimization.
- Developed a mobile security library using the Android NDK, with validation workflows supported by bash-based testing scripts to verify security behavior

 Yerevan, Armenia

EDUCATION

Bachelor of Mathematics and Mechanics

Yerevan State University
2009 - 2013

SKILLS

- Kotlin, Java
- Android SDK, Jetpack components
- GitHub Actions
- Fastlane automation
- Dependabot
- Firebase
- Mixpanel
- Adjust
- User Centrics
- Monday.com, Jira
- AI-assisted development workflows (GitHub Copilot, Gemini, Claude Code)

Android Developer - Altacode LLC

Jan 2014- Apr 2015

- Collaborated closely with cross-functional teams and contributed across the full development lifecycle of multiple mobile applications.
- Developed an application for a wearable smart glass device integrated with a sensoplex board, designed to support snowboarders through real-time data interaction and connected device communication.
- Contributed to game development using the libGDX framework, participating in gameplay feature implementation and application development.

Software Developer - Altacode LLC

Jul 2013- Jan 2014

- As a .NET intern implemented Tetris game using WPF framework
- Cashier tool using ASP.NET
