[Linkedin Profile](#)

Product Manager with 6+ years of experience scaling digital products in cross-functional, multicultural environments. Experienced in leading international product initiatives from discovery to delivery, aligning engineering, operations, marketing, and business stakeholders around shared outcomes. Strong track record of improving product adoption, optimizing delivery processes, and driving measurable business impact through data-informed decision-making. Combines hands-on product leadership with formal training in product strategy, AI-powered product management, and OKR-driven execution.

Experience

Product Manager at

Marktguru (HQ in Germany)

2023 - present

- Owned product strategy and end-to-end lifecycle for key product areas, balancing customer needs, operational constraints, and business priorities to identify high-impact opportunities.
- Drove product outcomes through data-informed prioritization and continuous validation, delivering a 30% increase in user retention and 10% faster delivery during scale-up
- Defined product logic, workflows, and prioritization decisions for core user journeys, ensuring alignment between customer problems, operational scalability, and long-term product goals.
- Applied AI-powered product management practices and modern AI tools to improve discovery workflows, research efficiency, and product execution processes.

Project Delivery Manager at Marktguru

2022-2023

- Led cross-functional product initiatives across globally distributed teams, aligning engineering, operations, and business stakeholders to deliver scalable customer-facing solutions.
- Drove organizational scaling initiatives by transitioning teams into smaller autonomous squads, increasing delivery efficiency by 20% and reducing operational bottlenecks.
- Introduced scalable product delivery processes and agile operating models to support the company's transition from startup-stage execution to enterprise-level operations.

Quality Assurance Engineer at Marktguru

2020-2022

- Spearheaded QA efforts across 5+ projects (2 mobile apps, 3 web-based platforms including CRM tools), leading the creation of comprehensive test cases from scratch to establish structured and repeatable testing processes. Improved overall QA efficiency by designing and implementing a streamlined bug reporting workflow, enhancing communication between QA and dev teams, and reducing issue resolution time by over 30%; also contributed to continuous integration pipelines with manual and exploratory testing feedback.

● **Quality Assurance Engineer (Remote)**
at Testlio - Projects: Meetup, Quizlet

- Partnered with globally distributed QA and product teams to ensure reliable, high-quality user experiences for large-scale consumer platforms, contributing to stable releases across web and mobile.

2021

● **Translator/Interpreter**
at The United Nations

- Accompanied and facilitated communication for a visiting delegation from Belgium's Fedasil agency, supporting effective dialogue during monitoring missions and contributing to the success of multilingual meetings and field visits.

● **Education**

● **Certifications:**

- **ProductLeadership & Strategy: CC4PM** (Command Course), Product Strategy & Execution
- **AI & Data:** AI for Product Management, Data-Driven Product Management

● **Master of Arts (MA) in Interpretation & Translation**

- American University of Armenia

● **Master of Arts (MA) in Linguistics**

- Slavonic-Armenian University

● **Certified OKRCoach/Master Advanced**

- DigitalWinners, Germany

● Graduate & Member at Leadrship in Tech Club
